

FOOD & PHARMA FILM

By utilizing only top-quality FDA resins and adhering to certified food manufacturing practices, we consistently provide our partners in the food and pharmaceutical manufacturing industry with products they can trust

FEATURES

- ISO9001 certification represents our dedication to implementing a robust quality management system
- Highest level of SQF (Safe Quality Food) certification
- Our products exceed the stringent standards set by the Global Food Safety Initiative
- Products utilize only top-quality FDA resins

ADVANTAGES

Our state-of-the-art manufacturing lines are capable of producing a diverse range of films, from monolayer combo liners and high puncture VFFS films to highly intricate coextruded barrier and peel seal films. We have the expertise and a wide array of resins to develop the perfect blend for your specific needs.

PRODUCT OPTIONS

At Crayex, our dedicated sales, service, production, and quality teams work closely with our food and pharma partners to develop customized films specifically tailored to their products. Consider the following options to find the most suitable packaging solution for your requirements:

- Narrow web
- Wide-width sheeting
- Gusseted
- Bottom seal leak-proof bags
- Separated bags in a box
- 40" OD rolls
